PROFESSIONAL SUMMARY

Python Backend Developer with hands-on experience building 6 production-grade REST APIs and microservices using FastAPI and Flask. Proficient in MySQL, MongoDB, and Redis for database integration and caching; JWT authentication and RBAC for access control; Docker and GitHub Actions for containerized CI/CD deployment. Actively seeking entry-level backend or Python developer roles to contribute to scalable, real-world backend systems.

TECHNICAL SKILLS

Languages: Python, SQL, Bash

Backend: FastAPI, Flask, REST API Development, SQLAlchemy, Pydantic, API Architecture

Databases: MySQL, MongoDB, Redis (Caching, Sorted Sets, HyperLogLog)

Security: JWT Authentication, Authorization, RBAC, bcrypt, Ownership Validation

Cloud & DevOps: AWS S3 (Presigned URLs), Docker, Docker Compose, GitHub Actions, CI/CD, Render, Vercel

Testing: Pytest, Unit Testing, API Testing, Automated Testing, CI Validation

Tools / Concepts: Git, CRUD, Request Validation, Error Handling, Swagger/OpenAPI, Microservices, Background Tasks

PROJECTS

MiniStream | FastAPI · Flask · MySQL · MongoDB · Redis · AWS S3 · Docker · GitHub Actions · Pytest

- Engineered a content streaming REST API with FastAPI implementing JWT authentication, creator workflows, S3 presigned URL uploads, Redis Sorted Set for real-time trending, HyperLogLog for unique view tracking, and a Flask microservice for notification delivery across 5 Docker containers.
- Implemented Pytest test suite and GitHub Actions CI/CD pipeline for containerized deployment on AWS EC2, ensuring continuous integration and validated releases.

AI Resume Screener | FastAPI · MySQL · MongoDB · Redis · AWS S3 · OpenAI · Docker · Pytest · GitHub Actions

- Built a FastAPI REST API for resume upload, PDF validation, and AI-assisted scoring using OpenAI GPT-3.5; multi-factor keyword matching with Redis caching reducing repeated AI API calls by 60%+, JWT authentication and ownership validation securing all endpoints.
- Designed S3-backed file storage with async background tasks for analysis processing; validated via Pytest and deployed through GitHub Actions CI/CD pipeline in a Dockerized environment.

Flask Advanced CMS | Flask · MySQL · MongoDB · Redis · AWS S3 · Docker · Pytest · GitHub Actions

- Developed a multi-vendor blogging REST API with Flask featuring three-tier RBAC (Admin / Author / Reader), post CRUD with draft/published/archived workflow, MySQL FULLTEXT search, Redis caching, nested MongoDB comments, and AWS S3 presigned URL media uploads.
- Integrated rate limiting middleware and global error handling; covered core flows with Pytest and deployed using Docker Compose and GitHub Actions CI/CD.

Cartify (E-Commerce Backend) | FastAPI · MySQL · MongoDB · JWT · Pydantic · Docker · Render · Vercel

- Architected an e-commerce backend REST API with FastAPI using dual-database design — MySQL for user accounts and orders, MongoDB for product catalog and cart — with Pydantic request validation, service-layer separation, and JWT authentication protecting all routes.
- Containerized with Docker and deployed backend to Render; developed companion Next.js/TypeScript frontend on Vercel to demonstrate end-to-end API integration.

FastAPI Notes API | FastAPI · MySQL · SQLAlchemy · Pydantic · JWT · Docker · Pytest · GitHub Actions

- Built a production-ready Notes CRUD REST API with FastAPI, SQLAlchemy ORM, and Pydantic validation; enforced user ownership authorization on all note operations with configurable JWT expiry and tag-based search.
- Achieved full CI validation through Pytest automated testing and GitHub Actions pipeline with Docker Compose deployment.

Task Manager API | Flask · MySQL · JWT · bcrypt · Docker · Pytest · GitHub Actions

- Implemented a Flask REST API using App Factory pattern and Blueprints for modular architecture; includes JWT authentication, bcrypt password hashing, task CRUD with user-specific ownership, request validation, pagination, and global error handling.
- Covered authentication and task flows with Pytest; automated build and deployment via GitHub Actions CI/CD with Docker containerization.

EXPERIENCE

React Native Frontend Intern — TaskHive Solutions Pvt. Ltd.

Jan 2026 – Jun 2026

Indore, MP

- Developed and maintained mobile UI components using React Native; collaborated with backend team on API integration and debugging across Android and iOS platforms.

EDUCATION

B.Tech — Computer Science Engineering

2021 – 2026

Shri Vaishnav Vidyapeeth Vishwavidyalaya (SVVV) | CGPA: 6.00

12th — MP Board, Bal Vinay Mandir H.S. School

70%

10th — MP Board, Bal Vinay Mandir H.S. School

70%

CERTIFICATIONS

IBM — Artificial Intelligence Advanced · IBM — Generative AI Intermediate · IBM — Machine Learning Fundamentals

LANGUAGES

Hindi — Native · English — Professional Working Proficiency
